EDUCATION

Gujarat Technological University

Bachelor of Engineering, Computer Science (CGPA: 9.35)

June 2027(Expected)

Ahmedabad

SKILLS

- **Tech Stack:** Python; C; CUDA C++ (Basics); PyTorch; Scikit-learn; NumPy; Pandas; OpenCV; Vector Database
- **Technical Expertise:** Deep Learning (CNNs, Transformers); Model Development & Evaluation; ML Data Pipelines; Feature Engineering; Agentic AI
- **Interests:** World Models Research; Medical AI ; SVLMs; LLM Reasoning; Automation Workflows; Agent Development

EXPERIENCE

Carnegie Mellon University — Xu Lab

Research Intern

Feb. 2026 – Present

Remote

- Developed deep learning models for brain MRI surface registration, improving anatomical alignment and preserving geometric consistency across datasets.
- Designed end-to-end pipelines for learning-based anatomical alignment, ensuring spatial structure preservation in medical imaging tasks.

Gujarat Technological University (GTU) — Prof. Raj Hakani [\[↗\]](#)

Undergraduate Researcher – MedOptm Project

Oct. 2025 -Present

Ahmedabad

- Built a compact vision-language model integrating CvT, Token Packer, and LLaMA (1.7B) for medical visual question answering.
- Designed a scalable dataset pipeline using biomedical caption datasets, enabling efficient training and inference.
- Achieved a METEOR score of 0.33 while optimizing model efficiency for real-world clinical usability.

Infosys Springboard

Machine Learning Intern [\[Certificate\]](#)

Nov. 2025 – Jan. 2026

Remote

- Led development of ANPR and ATCC systems, building deep learning models for multi-class vehicle detection and classification.
- Engineered automated data pipelines and applied data augmentation techniques, improving model robustness and scalability.
- Achieved 85% accuracy across 12 vehicle classes and improved overall performance by 4%.

Gujarat Technological University (GTU) — Prof. Raj Hakani [\[↗\]](#)

Undergraduate Researcher – Brain Tumor Classification

Jun. 2025 – Aug. 2025

Ahmedabad

- Designed a CNN-based MRI tumor classification model, improving generalization across multi-class datasets.
- Implemented a two-stage training strategy (neural head + fine-tuning) using a VGG16-based architecture.
- Achieved 97.88% classification accuracy; work accepted at ICMLDE 2025.

PROJECTS

- **BrainScan AI** : Developed and deployed a web-based CNN model for brain tumor classification, enabling real-time inference through an interactive interface. [\[↗\]](#)
- **Automated Article Generation (n8n)** : Designed an automated workflow integrating Notion, n8n, and Gemini API to generate, refine, and publish articles to Dev.to. [\[↗\]](#)

CERTIFICATIONS & ACHIEVEMENTS

- **Introduction to Machine Learning** — IIT Madras[\[↗\]](#), **Database Management Systems** — IIT Kharagpur[\[↗\]](#)
- **First author of a research paper published in Elsevier Procedia Computer Science** on brain tumor classification using transfer learning with pre-trained CNNs, achieving 98.77% accuracy across four MRI tumor categories.[\[↗\]](#)
- **Selected for Amazon ML Summer School 2026**, ranking among the **top ~2.3%** of applicants (**3,000 selected from over 130,000**) for Amazon's flagship machine learning program.
- **Published a Hugging Face dataset** that surpassed **4,000+ downloads within its first month** of release.[\[↗\]](#)
- **Winner, GTU State-Level Hackathon.**
